Belém area

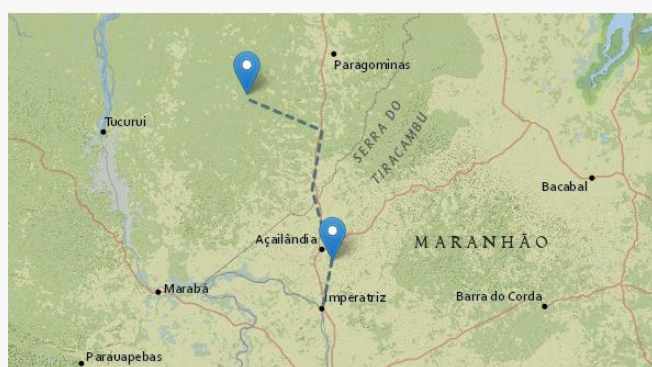

Roteiro área Belém

The Belém area is situated at the eastern edge of the Amazon beyond the Tocantins River and acts center of endemism. Unfortunately, this region is among the most threatened in the entire Amazon, with only remnants of primary forests remaining. However, these fragments harbor the majority of endemic and threatened bird species.

A área Belém encontra-se no extremo leste da Amazônia, delimitada pelo rio Tocantins, e atua como centro de endemismos. Infelizmente, esta é a região mais ameaçadas de toda a Amazônia, com apenas remanescentes bem preservados. No entanto, esses fragmentos abrigam a maioria das aves endêmicas e ameaçadas.

In this birdwatching itinerary, we visit three main locations: Açailândia and Fazenda Ipê. The table below shows a list of species that can be found in each of these locations, along with information about their rarity and endemism.

Neste roteiro de passarinhada, visitamos duas regiões principais: A cidade de Açailândia, e a Fazenda Ipê. A tabela abaixo mostra uma lista de espécies que podem ser encontradas em cada um desses locais, juntamente com informações sobre sua raridade e endemismo.

Species list

Legend: **R**- rare species; **E**- endemic species; **M**- migratory species.
Legenda: **R**- espécies raras; **E**- espécies endêmicas; **M**- espécies migratórias.

Common name	Nome comum	Scientific name	Açailândia	Faz. Ipê	R	E	M
Gray Tinamou	azulona	<i>Tinamus tao</i>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
